SUMMARY

Self taught software engineer and a generalist with a passion for each part of the entire stack. Over 8 years professional experience in frontend, backend, architecture and ops. Worked in various industries and has an ability to adapt to the new challenges presented with each industry. Quick learner with an attitude of there is nothing that cannot be learned. Hobbyist old broken gameboy repairer, tech enthusiast and automator of things.

EXPERIENCE

Senior Backend Engineer

Jigsaw XYZ (Contract)

2019 Mar - 2020 Apr

Fintech

Highlights:

- Supporting dev ops role
- Kubernetes via Openshift
- Enterprise client environment
- Internal lunchtime tech presenter

Description:

Create a digital SME offering in the Middle East for one of the biggest banks in the region. Main responsibilities include structuring and writing the backend services. Supporting the inhouse devops team with deployment of the services and helping the inhouse Technical Lead with integration into the bank and their existing infrastructure. Design project to fit into existing infrastructure and wrap the internal core services and add layers on top to create benefits for the customers as well as support for a multi region offering to allow for a potentially global customer base.

Tech:

NodeJS **Express** **Docker** **Lerna** **MongoDB** **Openshift**

Senior Backend Engineer

Elateral (Contract)

2017 Sep - 2019 Jan

Advertising

Highlights:

- Team lead
- Technical architect
- Upskill remote team
- GraphQL evangelist for the company

Description:

Technical architect and developer working directly under CTO for a complete backend rewrite of a marketing CMS and design application. Stack: Azure, K8s, Nodejs, Docker, GraphQL (microservices, eventually consistent, polyglot persistence). Additionally, implement an Adobe suite plugin compatible with PS, ID, AI to allow import / export functionality with the system (Adobe CEP/Nodejs).

Tech:

NodeJS **GraphQL** **Docker** **Kubernetes** **Azure**

Senior FullStack Engineer

Music-Group

2016 May - 2017 Jul

Pro Audio

Highlights:

- Team lead / Built team
- NodeJS on embedded
- Internal tooling for AWS
- Docker evangelist for the company
- Push CI/CD via containers vs VM in bamboo

Description:

Architect and design a REST api written in Nodejs for various embedded devices and customer facing web apps. Collaborate with multiple teams to create seamless cloud integration for multiple products. Assist in growing the team by writing and reviewing code tests and participate in hiring process. Introduce multiple teams to tools like Docker and Serverless.

Tech:

NodeJS **Hapi** **Docker** **AWS** **ECS**

Senior Frontend Engineer

Black Swan Data

2016 Feb - 2016 May

Digital Agency

Description:

Create deployment strategy from developer to client and upgrade existing projects to use Webpack. Upskill the team with AngularJS. Lead the development on the Black Swan Edge project implementing ThreeJS and voice recognition into the angular project with underlying webpack build. * Short period because of a business decision to close the Manchester office.

Tech:

AngularJS 1.x **Webpack** **CSS** **ThreeJS**

FullStack Engineer

Fanatical (Bundlestars)

2015 Apr - 2016 Jan

E-commerce

Description:

Complete port of previous system based on LAMP stack to MEAN stack. Upgrading the new system as per licensing agreement requirements from publishers. Working daily from Frontend to Backend. Main responsibility being Elastic Search and complex sorting of results per business requirements (geo, pricing, sales, ask for more details). Brought onto the team initially as an AngularJS specialist to upskill the team and to work full stack.

Tech:

NodeJS **AngularJS 1.x** **Webpack** **CSS**

FullStack Engineer

APWebb Plant Hire

2013 Dec - 2015 Apr

Railway

Description:

Designing, developing and architecting a web and mobile based NFC asset management system with an API layer built with NodeJS / ExpressJS, desktop client built with AngularJS and a mobile client built with Cordova.

Tech:

NodeJS **AngularJS 1.x** **Express** **Cordova** **CouchDB**

Junior Engineer

Freelance

2011 Aug - 2014 Mar

Various

Description:

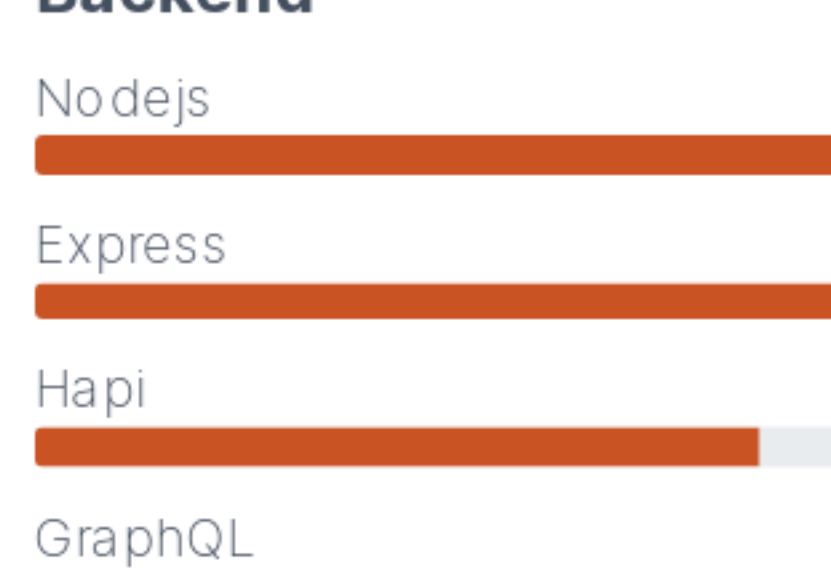

Various paid and unpaid projects for portfolio building and experience. The two largest projects were estate agent photography management tools and cleaning business employee tracking and management.

Tech:

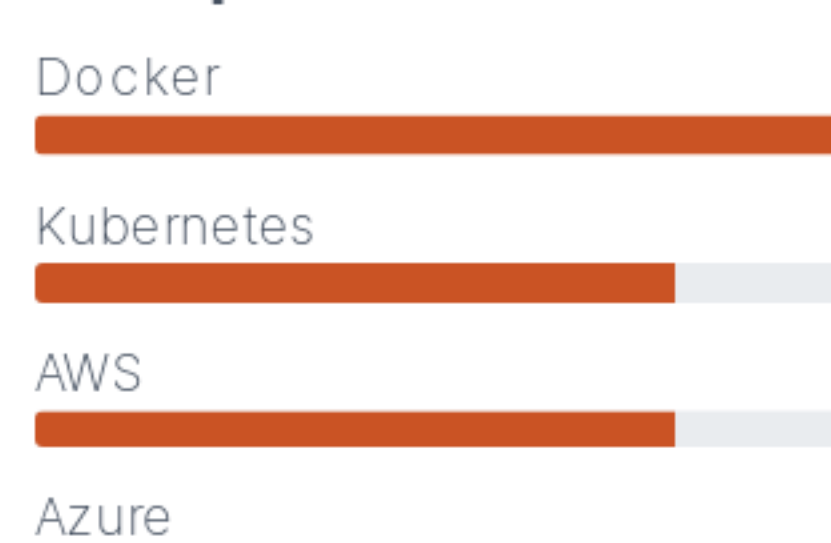

JQuery **C#** **ActionScript** **LAMP / WAMP** **Laravel** **HTML** **CSS**
